Report on the 'Internal Smart India Hackathon' held on 23rd September 2023

On 23rd September 2023, Internal Hackathon for Smart India Hackathon (SIH) 2023 was organized where 75 teams consisting of 450 students under 31 mentors have demonstrated their innovative ideas through soft and hard prototypes in front of esteemed jury members. It's really the day where knowledge is represented in the form of execution, blended with a few out of the box innovativeness, two-way interactions with juries, meaningful presentations constricting with physical limitations. The perfect way to implement NEP 2020 in technical field, where all the contributions may truly help to get rid of present barriers we are still facing. The event was jointly organized by IIC RCCIIT, IQAC & SWC. This is the 2nd Hackathon organized by RCCIIT within one calendar year.
